

YEAR 5 CLASS CAS PROJECT: COLLABORATION WITH CareBrotherSG

CareBrotherSG is a ground-up initiative dedicated to improving the health and well-being of migrant workers in Singapore. Despite their crucial role in our workforce, these individuals often face significant barriers to healthcare access and social integration.

Our partnership with CareBrotherSG began in February 2024, with a focus on developing educational materials and conducting health sessions at a dormitory in Punggol. Through these interactions, we have gained a deeper understanding of their challenges, including financial struggles, unfair treatment, and the significant impact of even minor injuries on their livelihoods. Their resilience and dedication to supporting their families are truly inspiring, but they require more support to navigate life in Singapore successfully.

Students' Reflections:

"We prepared goodie bags and assisted with various health screening tasks such as blood pressure checks. Despite logistical hurdles, we successfully completed the screenings. Witnessing the workers' gratitude made this experience rewarding."

Chloe Oh Hui Xuan (5.15)

"This experience provided an opportunity to treat each individual with the dignity they deserve and offer practical support by identifying potential health concerns and providing guidance on lifestyle modifications to mitigate them."

Janie Chia Lee Xuan (5.15)

Preparing care packages for the migrant workers

Our team of volunteers taking the scenic route to the dormitory

Conducting health assessments to ensure the well-being of our migrant workers
